

THATHALO **Aidapt™**

EASY STEP-BY-STEP WORKFLOW

Simple decontamination. Step by step.

Aidapt helps you find contamination and decontaminate the target area quickly with an intuitive tap-and-tilt workflow.

1 POWER ON

ACTIVATE
Double tap Aidapt
to switch on inspection
mode. No menu
navigation is needed.

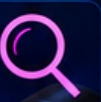

Ready for inspection

2 PURPLE MODE

DETECT

Scan the target surface
with purple light and locate
visible fluorescent
contamination.

Contamination becomes visible

3 UV MODE

START TREATMENT

Point Aidapt at the target
area, then tilt the device
head up and down to start
the timed UVC cycle
automatically.

UVC cycle activated

4 DECONTAMINATION

TREAT

Keep the light on the target
area during the short
treatment cycle. Aidapt then
returns to inspection mode
so you can continue.

Fast, intuitive and easy to use

Integrated
motion control

Gyroscope
safety switch

No trained
staff required

SEE IT → TREAT IT → MOVE ON

Follow the operating instructions. Avoid direct UV exposure to eyes and skin.
